When we are young, we learn that tigers and sharks are dangerous animals. We might be scared of them because they are big and powerful. As we get older, however, we learn that sometimes the most dangerous animals are also the smallest ones. In fact, the animal that kills the most people every year is one that you have probably killed yourself many times: the mosquito.

While it may seem that all mosquitoes are biters, this is not actually the case. Male mosquitoes eat plant nectar, female mosquitoes feed on animal blood. They need it to live and produce eggs. When a female mosquito bites a human being, it transmits a little saliva into the blood. This saliva may or may not contain a deadly disease. The result of the bite can be as minor as an itchy bump or as serious as death. Because a mosquito can bite many people in the course of its life, it can carry diseases from one person to another very easily. Two of the most deadly diseases carried by mosquitoes are malaria and yellow fever. More than 700 million people become sick from these diseases every year. At least 2 million of these people will die from these diseases.

Many scientists are working on safer and better ways to kill mosquitoes, but so far, there is no sure way to protect everyone in the world from their deadly bites. Mosquito nets can be placed over beds to protect people against being bitten. These nets help people stay safe at night, but they do not kill any mosquitoes. Mosquitoes have many natural enemies like bats, birds, dragonflies, and certain kinds of fish. They can also be killed with poisons or sprays. Even though these sprays kill mosquitoes, they may also harm other animals or plants.

1. According to the text, some people are more afraid of tigers and sharks than mosquitoes because tigers and sharks

- a. kill more people than mosquitoes.
- b. are big and powerful.
- c. have no natural enemies.

2.

- a. Male and female mosquitoes have different eating habits.
- b. The saliva of a female mosquito is poisonous.
- c. 2 million people are infected by the diseases carried by mosquitoes.

3.

- a. Female mosquitoes feeding on blood are more fertile than those eating nectar.
- b. Blood is essential for mosquitoes for reproduction.
- c. Nectar and blood are the two sources of life for mosquitoes.

4. Dragonflies might reduce the number of mosquitoes because

- a. they attract bats.
- b. they cannot be killed by poisons or sprays.
- c. they kill mosquitoes.

5.

- a. Mosquito nets provide adequate protection from deadly mosquitoes.
- b. Poisons and sprays provide adequate protection from deadly mosquitoes.
- c. There is no perfect solution to the mosquito problem.

4. Írjon fogalmazást vagy levelet (kb. 120-150 szó terjedelemben) a megadott szempontok felhasználásával! Térjen ki röviden minden megadott szempontra és alkosson egységes, összefüggő szöveget!

A) Írjon fogalmazást vásárlási szokásairól!

- milyen gyakran jár vásárolni és milyen boltokat szeret,
- milyen szempontok alapján vásárol dolgokat (pl. ár, minőség, kényelem, egészség, stb.)
- melyek a tapasztalatai az internetes vásárlást illetően,
- írjon legutóbbi vásárlásáról (mit vett, hol, elégedett-e vele, stb.)

VAGY

B) Nemrégiben költözött új lakásba. Írjon levelet angol barátjának, melyben

- elújságolja a hírt,
- fejtse ki, hogy miért döntött a költözés mellett (új munkahely, nagyobb lakásra volt szüksége, nem szerette a régi környezetet, stb.)
- mesélje el, milyen felújítási munkálatokat végeztek az új lakásban a beköltözés előtt,
- számoljon be a lakásavató partiról, amit a minap tartottak (kit hívott meg, hogy sikerült az este, mi volt a meghívottak véleménye az új lakásról, stb.).
